

## Sports Results – Spreadsheet Exercise

**Aim** – To develop usage of spreadsheet formula and graphs.

### Task –

- Produce a spreadsheet that will automatically calculate sports results for a sport of your choice.
- Add data for at least **10** teams.
- Produce at least **three** graphs that illustrate the performance of the teams.
- Print the data with the teams sorted according to results and alphabetically.

Example:

Teams	Played	Won	Lost	Drawn	Goals For	Goals Against	Points
Men Utd	4	0	3	1			
Liverlake	4	4	0	0			
Rope Utd	4	2	2	0			

Win = 3 Points

Draw = 1 Point

Loss = 0 Points
